

## Whole health synergy

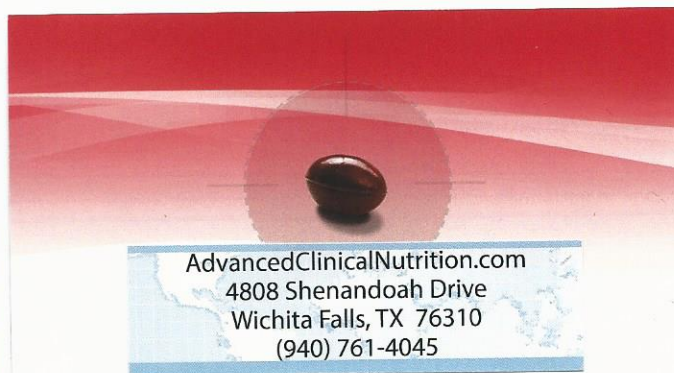

One Product, Multiple Synergistic Benefits

**Dr. Ohhira's Propolis PLUS®** provides immune-boosting Brazilian green propolis, a powerful antioxidant anti-inflammatory blend, and an extract of multiple vegetables fermented to concentrate their health benefits.

- Support immune response
- Provide antioxidant activity
- Promote healthy digestion and metabolism
- Enhance absorption of nutrients
- Support whole health and energy

Today's health threats are concentrated in two key areas: the oxidation/inflammation cascade and digestive issues. Wouldn't it be ideal to offer a natural solution that addresses both of these challenges?

**Why Brazilian Green Propolis?** The potency and composition of propolis depends on the vegetation around the bees' hive. The Gold Standard of propolis, Brazilian green propolis is derived mostly from Alecrim (*Baccharis dracunculifolia*), an herb peculiar to South America. Green propolis contains very high cinnamic acid derivatives (i.e. Artepillin C) making it more potent than any other source. Preserving that potency, our propolis ingredient is carefully removed using a water-soluble extraction method.

There is no other single-product combination like Propolis PLUS on the market today.

A perfectly balanced blend of 100% natural ingredients:

**Propolis extract** – High potency Brazilian green propolis for antioxidant, anti-inflammatory, and immune system support.\*

**Vitamin E** – Additional antioxidant support with  $\alpha$ -Tocopherol and Tocotrienol for overall cellular and dermal health.\*

**Astaxanthin** – A red carotenoid extracted from *Haematococcus* seaweed. Highly absorbent ester form delivers antioxidant benefits throughout the body.\*

**Flax Oil** – Provides  $\alpha$ -linolenic acid (Omega-3s) often lacking in modern diets. Balances the common excess Omega-6 intake.\*

**Probiotic Extract** – Multiple vegetables fermented with beneficial lactic acid bacteria to concentrate their health benefits. Powdered fermented vegetable extract supports nutrient absorption, stimulates friendly bacteria in the gut, and balances the inflammation cycle.\*

**Propolis** – a natural protective antibiotic substance that bees apply throughout the interior of their hives. Flavonoid-rich, it is derived from plant and tree resins. In the hive, propolis protects against pathogens, molds, and bad bacteria.

**Warning:** Persons with known allergies to ingredients produced by bees should contact their health care professional before consuming. Keep out of reach of children. If pregnant or nursing, consult a health professional before use.  
**Tamper evident:** Do not use if foil blister pack is broken.
