

Clinical Nutrition Therapeutic and Maintenance Services Overview

Refer to "Services and Fees" for details of what is included in the Analysis Fees quoted below and Guidelines To Select Biochemical Tests, in addition to the Fees for a Dietary Analysis, Consultations, Therapeutic Supplement Plans, Lab Fees and more!

Five Types (or Options) of Clinical Nutrition Therapeutic Services					Maintenance Services
Four Clinical Nutrition Analysis of Nutritional Biochemistry Tests To Identify and Correct Causes of Symptoms and Restore Health 95% of The Causes for All Symptoms are Due to Nutritional Deficiencies/Excesses and Toxicity (Stage 1), Biochemical Imbalances (Stage 2) and Organ/Gland Dysfunctions (Stage 3), the three Stages that precede Disease (Stage 4). 5% is due to Injury or Hereditary Factors.				Clinical Nutrition Support	Our Health Maintenance Services are similar to those provided by other Health Stores or Online Vitamin Company with one significant difference. Our Maintenance Vitamin and Minerals are Whole foods, whereas the supplements that are sold directly to the public today (i.e., without going through a doctor like Dr. Smith) are synthetically made or isolated forms of vitamins. Our Maintenance Services are ideal for those who are not ready to start Clinical Nutrition Therapy and for those who have completed their Therapy and are ready to maintain ideal health for a lifetime. For more information, read Dr. Smith's Article, titled <i>Three Ways Supplements Are Manufactured Today</i> . Cost of whole food maintenance supplements are competitive and even less than other companies. For example, at the time of this writing a 30 Day Supply of our whole food multiple vitamin costs \$14.00. • No Testing Required • Free Consultations You may call or email orders as needed or request monthly auto-shipment. First Order Must Be Placed by Phone!

Comprehensive Nutritional Biochemistry Blood ♦ Hair ♦ Urine Saliva ♦ Stool	Basic Nutritional Biochemistry Blood ♦ Hair ♦ Saliva Male/Female Hormone	One or More Nutritional Biochemical Test Blood ♦ Hair ♦ Urine Saliva ♦ Stool	The 26 Body Systems <i>10 Biological Systems and their 16 Subsystems</i>	Medical Diagnosis From Any Other Health Care Provider, such as your physician or chiropractor.	
\$1750 (Reg. \$2000)	\$1300 to \$1350	\$250 - \$450 ea.	\$250	\$150	
WELLNESS: Option #1 is ideal for those who are interested in Wellness. In other words, to identify and correct nutritional deficiencies, biochemical imbalances and organ/gland dysfunctions which are causing your current symptoms as well as those not yet severe enough to produce symptoms. TIME SENSITIVE: Option #1 is ideal for those with Chronic, Critical and Time Sensitive Health Conditions in order to improve health as quickly as possible. DISEASE PREVENTION: Option #1 is also ideal for those over who have never had any Nutritional Biochemical Testing done in order to improve their health at all levels of biochemistry, thus prevent the diseases in the elderly years and/or restore health if suffering from disease. The purpose for Option #2 is the same as Option #1; however, Option #2 provides the three basic Nutritional Biochemical Tests, instead of the comprehensive five.		CONDITIONAL CARE Option #3 is often selected for those interested in improving the areas of the body that are bothering them the most at this time. We call this Conditional Care because testing is focused on identifying and correcting the causes of the client's current health challenges, rather than also including a focus on over-all body Wellness and Disease Prevention. (Options #1 & #2) Option #3 is also for those who are not in a time-sensitive state (See definition below). ===== <u>Lab Fees for saliva, stool & urine tests not included.</u>	Option #4 is a Scientific Clinical Nutrition Evaluation of the most Severe To Mild Health State in the following Biological Systems. Option #2 is not biochemical testing like Options #1 to #3. <ol style="list-style-type: none">1. Gastro-Intestinal2. Detox Metabolism3. Immune Function4. CardioVascular5. Glucose Tolerance6. Pulmonary (Lungs)7. Urological (Kidneys/Bladder)8. Male or Female Hormone9. Musculo-Skeletal10. Neurological Starting with the most severe body system, Clinical Nutrition Therapy is provided for each body system in order of priority until health is restored in all 10 body systems.	Option #5 is for those who are interested in having Clinical Nutrition Therapy to support a current diagnosis. For example, you simply provide medical records from your physician that supports your diagnosis. Option #5 focuses on: <ul style="list-style-type: none">• Replenishing nutrient depletion and remove toxicity from drug therapy.• Providing nutrients cells require to restore health.• Note: Option #5 is included in Options #1, #2 and #3 at no additional charge.	
A Time Sensitive State is when a physician says you have only so much time to live or that surgery is going to be required in the future if a particular area of the body does not improve.
